

To Whom It May Concern,

I am pleased to write this letter of recommendation for Özlem Tonbul, who worked with MindArk.ai as a Digital Marketing & Data Analyst Intern.

During her time with us, Özlem took on a wide range of responsibilities across both marketing and data-focused projects. Her work included data acquisition and research, analyzing shifts in public opinion to assess market viability across different countries, and generating and validating high-quality B2B lead lists for our SaaS product.

Özlem consistently demonstrated strong analytical thinking, technical proficiency, and a proactive mindset. She frequently exceeded expectations, met or beat deadlines, and volunteered to take on additional responsibilities beyond her assigned scope. Her ability to combine data analysis with marketing strategy made her contributions particularly valuable to our team.

She showed solid skills in data analysis, research methodology, and practical problem-solving, and was able to translate complex findings into clear, actionable insights. Özlem also worked independently with a high level of professionalism and reliability, making her a trusted member of the team throughout her internship.

Based on her performance and dedication, I have no hesitation in recommending Özlem for roles in Digital Marketing, Data Analytics, or other data-driven positions. I am confident she would be a strong asset to any organization and would excel in technically demanding and analytical environments.

Please feel free to contact me should you require any further information.

Sincerely,

A handwritten signature in black ink that reads "Omno Gardezi". The signature is written in a cursive style and is underlined with a single horizontal stroke.

Omno Gardezi  
CEO & Founder
